

Wiring instructions for SL-24 series Stacklights

C terminal is Common to all connected modules.
Numbers 1 through 5 refer to the modules, from the base to the top.

- C** = Common (Power supply ground)
- 1** = +24VDC for first module
- 2** = +24VDC for second module
- 3** = +24VDC for third module
- 4** = +24VDC for fourth module
- 5** = +24VDC for fifth module

These light modules are twist-lock assembled. Remove the bottom base module and unsnap the wire terminal to access it.
