## AGIP KAZAKHSTAN USE SHARPEYE IR3 DETECTORS

The Kashagan Field, in the Kazakhstani zone of the Caspian Sea, has invested in over 2,000 SharpEye IR3 Flame Detectors.

The AGIP Kashagan Field provides an extremely harsh environment for the detectors to work in and in spite of this, the SharpEye IR3 detectors continue to provide top detection with the highest accuracy, reliability and the highest immunity to false alarm.

## OMV PETROM PROTECTED BY SHARPEYE

Existing customer, OMV Petrom, have recently decided to increase the number of SharpEye 40/40I Optical Flame Detectors they use. The already successful 40/40I detectors have been installed in one of OMV Petrom's sites in Romania.

The 40/40I Optical Flame Detector is multi spectrum, based on three IR bands (IR3), detecting fuel and gas fires at long distances with the highest immunity to false alarms. The 40/40I IR3 can detect a 1ft2 (0.1 m2) gasoline/heptane pan fire at 215 ft (65m) in less than 5 seconds.
