

HEJRE OIL FIELD PROTECTED BY TRIPLE IR

SharpEye 40/40I IR3 Optical Flame Detectors have recently been selected to protect the Dong Energy Hejre Crude Stabilization Project, in Denmark.

The Hejre offshore oil field is operated by Dong Energy and is located in the North Sea and selected the 40/40I due to great detection distance, its highest false alarm immunity, detection speed, among many other leading features.

Please click [here](#) for more information about the Triple IR detector.
